

MOBIUS M9 SORTER

Bud sorting has been revolutionized with the all-new Mobius M9 Sorter and optional M9 Autofeed Conveyor.

The M9 employs a decades-old agricultural sorting technology but brings it into modern world of post-harvest automation, in typical Mobius fashion. The M9 addresses the specific characteristics of not only the products it sorts, but the regulatory environment it will operate in. Th Integrated safety locks, stainless steel construction, tool-free breakdown of the entire machine in just minutes, and fully wash-down rated, the M9 fits seamlessly into a GMP workflow. The longest sorting bed and limitless adjustment of the grading bays delivers the most precise grading in the business, and 9 noodle belts provide massive throughput volumes the competition can't touch. All this in a package that is shorter, narrower, and wheels easily through a 32" doorway for easy deployment and washing.

KEY FEATURES

- 440 lbs per hour
- GMP-Ready stainless steel construction
- Industry-leading 78" sorting zone for precise flower sorting
- 9 sorting belts for high-volume throughput
- Tool-free disassembly
- SCADA compatible HMI controller
- Safety-first design
- Fully configurable for left or right outfeed configurations

SPECIFICATIONS

Wet / Dry Capable	Yes
Construction	Anodized Aluminum & 304 Stainless Steel
Speed Adjustments	11 Speed Settings
Number of Belts	9
Belt Diameter	5/16"
Belt Drive Motor	1/10 HP
HMI Control	Yes
Power Requirements	110V, 1.5 AMPS
Tool-Less Disassembly	Yes
Fits Through a 32" Door	Yes
Width	30"
Length	94"
Height	46.5"
Weight	450 LBS
Warranty	1 year
Certifications	CSA, CE, UL Certified Electronics
Accessories	<ul style="list-style-type: none">• Autofeed Conveyor• Additional Dividers• Additional Belts and Rollers
